Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION***Election/Restrictions***

1. The applicant has previously elected invention II (the apparatus of a wing) in the paper filed 10/6/05.

Newly submitted claims 16-18 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 16-18, drawn to a method for using an aerodynamic wing, classified in class 244, subclass 155A.

Inventions of claims (16-18) and (9-11,14 and 15) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus may be used in a method which does not involve control via control lines.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims **16-18 are withdrawn from consideration** as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5244169 to Brown et al. (hereinafter called 169).

a. Re claim 9, 169 discloses interconnected inflatable leading edge and rib struts in figure 7, where the rib strut 31 is shown to be connected to the leading edge strut 30. As seen in figure 7, there is an air pathway connection 32'. The air pathway connection being configured that if 32' is empty of pressure or at the same pressure as the 30 and 31, then there is a configuration in which air flow from 30 to 31 is allowed when the regulator is open. Also when the regulator is closed there is a lack of air flow between the 30 and 31. For example when there is equal pressure in all of the sections and the regulators are open, if you squeeze the 30 side, air will flow through 32' and pressurize 31. The regulator is the valve and seen in column2 at lines 59-65 at least.

b. Re claims 14 and 15, 169 discloses that in the second configuration the valve (regulator) prevents air from traveling from the rib to the leading edge strut

when the valve is closed and the leading edge strut loses pressure. Also 169 discloses that in the second configuration the valve (regulator) prevents air from traveling from the leading edge strut to the rib strut when the valve is closed and the rib strut loses pressure.

Allowable Subject Matter

4. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose either alone and/or in combination the valve being a clamp and flexible tube.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3643

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
